

Administrative Psychiatry

This rotation occurs as a required rotation in the PGY 3-4 year. The senior resident becomes a "junior attending" and is responsible for selective areas of the St Lawrence Adult Psychiatry Unit's administrative management. The rotation can be selected in 1-2 month blocks and is designed to give senior residents experience with running an inpatient psychiatry unit. This unit provides care to some of the most severely ill psychiatric patients in the tri-county area. It is also a training site for psychiatry residents, medical students and students in other related disciplines.
