(*) May be met by viewing on-line module in D2L

(+) A non-confrontational therapy used to support the patient's functioning and coping strategies. It is best suited for a patient with a high level of functioning who is currently overwhelmed but may be used to strengthen functioning for a patient with limited abilities needing supportive direction. The therapist establishes a reality-based working relationship and may provide reinforcement for positive behaviors, make suggestions

on topics such as limit setting or environmental changes, offer genuine reassurance, as well as encouragement to deal with stressful situations. The patient may receive praise and encouragement to use coping strategies that reduce stress and manage conflict.

Comments: _____

Wellness: An active process of becoming aware of and making choices toward a healthy and fulfilling life.

Have you set one personal wellness goal you would like to accomplish during this rotation?

Yes
 No

Did you accomplish this goal by the end of the rotation?

Not at all
 Somewhat
 Completely accomplished goal or exceeded

Osteopathic Principles and Practices (OPP)- briefly describe how you used OPP on one patient during this rotation:

I participated in interprofessional collaboration (collaboration on patient care with healthcare workers of different professional backgrounds) on this rotation:

Yes No
